☞ CHARLES-TOWN, Printed by PETER TIMOTHY, at the Printing-Office, in BROAD-STREET.

Where Advertiſements and Subſcriptions for this Paper are taken in,—all kinds of Printing-Work done, with Accuracy and Diſpatch,—and Leaſes and Releaſes, and all other ſorts of Blanks ſold.

His Honour the LIEUTENANT-GOVERNOR, Preſident, GABRIEL MANIGAULT, Eſq; Vice-Preſident, and the Members of the CHARLES-TOWN LIBRARY SOCIETY, having favoured the Subſcriber with the Uſe of their LIBRARY-ROOM, for the more convenient Exhibition of his Experiments, and for the better Accommodation of the Ladies and Gentlemen who may be pleaſed to attend his Lectures.

For the ENTERTAINMENT of the

CURIOUS,

Will be exhibited, in the ſaid LIBRARY-ROOM, *a Courſe of* EXPERIMENTS, *in that inſtructive and entertaining branch of natural Philoſophy, call'd* ELECTRICITY, *to be accompanied with Lectures on the nature and properties of* Electric Fire.

The COURSE to conſiſt of Two LECTURES.

LECTURE I.

I. OF ELECTRICITY IN GENERAL, with ſome Account of its Diſcovery.

II. Experiments, ſhewing that the electric Fire, commonly produced by the Friction of Glaſs, is not created by that Friction.

III. That it is not extracted out of the Subſtance of the Glaſs.

IV. That it is not collected out of the circumambient Air: But,

V. That it is attracted by the excited Glaſs from the Earth, by Means of intermediate non-electric Matter; the whole terraqueous Globe and every Thing thereon poſſeſſing a large Quantity of it, called the *natural Quantity*.

VI. That our Bodies contain enough of it, at all Times, to ſet an Houſe on Fire.

VII. That it has when in a ſtate of Reſt, no ſenſible Heat.

VIII. That by it's violent Motion, in paſſing thro' other Bodies, it produces a very intenſe Degree of Heat,

IX. That it is not the ſame with culinary Fire.

X. That it will live in Water, as well as in any other Body; and Sparks may be ſeen and felt riſing out of the Water, or even Ice, that will kindle up a burning Flame.

XI. That it is an extremely ſubtle Fluid, paſſing thro' ſo denſe a Body as Metal, with the greateſt Facility; even more readily than thro' any other Matter we are acquainted with.

XII. That ſome Bodies electriſe *poſitively*, or increaſe the natural Quantity in Bodies, whilſt others electriſe *negatively*, or diminiſh it.

XIII. That the ſame Body under different Circumſtances may be made to electriſe both poſitively and negatively.

XIV. That Bodies having only their natural Quantity, neither attract nor repel each other.

XV. That Bodies having their natural Quantities equally increaſed or diminiſhed, ſeem to repel each other.

XVI. That this is not a real Repulſion, but apparent only: there being no repulſion between electriſed Bodies.

XVII. That Bodies having different Quantities in Proportion to their Magnitude, attract each other, and the greater the Difference, the ſtronger the Attraction.

XVIII. That different Quantities in ſeparate Bodies may be reduced to an Equality, by Means of Metal, in the Form of a ſlender ſharp Point, more readily and at a greater Diſtance than in any other Form.

XIX. A ſurprizing Property of an electric Atmoſphere, whereby Bodies may be electriſed both *plus* and *minus*, by the ſame Glaſs and ſame Friction.

XX. An artificial Spider, animated by the Electric Fire ſo as to act like a live one.

XXI. A new Property diſcovered in electriſed Points; by Means of which will be exhibited a Sort of electrical Horſe Race.

XXII. Electriſed Money, which ſcarce any one will take when offer'd to them.

XXIII. The Salute repulſed, or Fire darting from a Lady's Lips or Cheek, ſo that ſhe may defy any Gentleman to ſalute her.

XXIV. Fire darting from a Lady's Eyes, that will kindle Spirits (without a Metaphor.)

XXV. A diverting Experiment, which cannot well be underſtood but by thoſe who try it.

XXVI. A Battery of ſeven Guns, diſcharged by Fire iſſuing out of a Perſon's Finger.

LECTURE II.

I. A Deſcription and Explanation of the famous *Leyden Experiment*, which is the Foundation of moſt of the principal Improvements that have ſince been made in Electricity.

II. The amazing Force of the Electric Fire in paſſing through a Number of Bodies at the ſame Time.

III. The Electric Fire ſhewn to be the ſame with Lightning.

IV. A bright Flaſh of real Lightning darting from a Cloud, in a painted Thunder-Storm.

V. The Cauſe and Effects of Lightning explained.

VI. The Force of a ſmall Quantity of it, making a fair Hole through a Quire of Paper.

VII. An Animal killed by it inſtantaneouſly.

VIII. Metal melted by it on Glaſs, and ſome part of it incorporated with the Subſtance of the Glaſs.

IX. A Wire heated ſo as to become red and burning hot.

X. An Experiment ſhewing why Thunder-Clouds float ower in the Air than other Clouds; and why Eminences are more frequently ſtruck.

XI. Why we have Thunder more frequently in Summer than in Winter.

XII. An Experiment ſhewing that Lightning when it ſtrikes a Houſe, may be prevented from doing the leaſt Damage.

XIII. An Experiment ſhewing what Part of a Houſe or Chamber, not properly ſecured, is ſafeſt to remain in, during a Guſt, or in Caſe of the Houſe's being ſtruck with Lightning.

XIV. An Experiment ſhewing a probable Method of preſerving Houſes, Ships, &c. from being ſtruck with Lightning.

XV. The endeavouring to guard againſt Lightning, in the Manner propoſed, ſhewn not to be chargeable with Preſumption, nor inconſiſtent with any of the Principles of natural or revealed Religion.

XVI. The Manner of erecting an Apparatus in Houſes for making Experiments on the Poſitive and Negative Electricity of the Clouds in Thunder-Storms, &c. ſhewn by an Experiment, with an exact Repreſentation in Miniature of ſuch an Apparatus.

XVII. A Battery of ſeven Guns, fired by a Spark paſſing through cold Water.

By WILLLIAM JOHNSON.

As the Knowledge of Nature tends to enlarge the human Mind, and give us more noble and exalted Ideas of the GOD OF NATURE, *'tis hoped that this Courſe will prove, to many an agreeable Entertainment.*

The Works of the LORD are great, and ſought out of all them that have Pleaſure therein.

AS the time I have undertaken to inſpect INDICO for ſale in this town, at *one per cent.* expired the 25th of March paſt; it is neceſſary I ſhould acquaint the public, that it will not hereafter ſuit me to do the ſame for leſs than *two dollars* per hundred; and that, for ſorting, garbling and ſealing Indico, from thoſe whoſe names are not in my regiſter for the three laſt crops, I ſhall expect *five per cent.* on invoice, provided they ſignify their intention to employ me, before the 20th of July next, accompanied with a *ten pounds* bill.

If after this offer, any ſhould have reaſon to complain that their Indico, ſent home without my ſeal and certificate, is a drug there, they muſt blame themſelves for preſuming it would be otherwiſe.

At the ſame time, I would adviſe all perſons who have Indico damped or purpoſely wetted, or who jumble the 1ſt, 2d and 3d ſorts together, in order to impoſe on purchaſers, not to offer the ſame for my inſpection; as I am determined always to publiſh my opinion of ſuch parcels, with the names of the makers, or venders, in the very next gazette, to prevent its being any longer thought at home that, by my ſilence, I am *the father of*, or countenance, *all the iniquitous practices which have been committed with Carolina Indico.*

MOSES LINDO, Inſpector-General of Indico.

MR. TIMOTHY,

AS ſeveral diſputes have lately ariſen, concerning the payment of PILOT'S FEES; I deſire you to inſert the following extract from the law, for the information of all perſons intereſted for the future, that no one may plead ignorance.

Juſt arrived in the Brigantine Antelope, Thomas Paly, Maſter, directly from the River Gambia, by

MIDDLETON, LISTON, & HOPE.

CHARLES-TOWN, MAY 4, 1765.

BY the lateſt accounts we have been able to procure from the Cherokees, we are informed, that the ill diſpoſitions which had begun to appear in ſome of the Over-Hills towns, have been removed by the diſcreet behaviour of ſeveral white perſons in the nation, and the ſteady attachment to the Engliſh which has been ſhewn by the Little Carpenter, Judd's-Friend, and Ouſteneka or the Standing Turkey.

That ſome of the Valley Towns have applied to his honour the Lieutenant-Governor, for more traders to be ſent amongſt them, with ſtrong aſſurances of kind treatment towards thoſe who ſhall carry goods thither.

That one of the Frenchmen ſeized at Fort l'Aſſompton, by Judd's-Friend and his party, had been taken from them by the Great-Warrior and his, to be carried to the Illinois. The other is arrived in town.

That ſeveral Cherokees having been killed by the Shawaneſe near Settiquo, above 200 Warriors had been fitted out to purſue them to their very towns for revenge; in which party, it is ſaid, the Young Warrior of Eſtatowih is gone.

That the ſuſpicion which the Cherokees had entertained, that the five men they loſt this ſpring about 15 miles from Eſtatowih, were killed by the Catawbas, is now entirely removed, it having been diſcovered to be done by Northward Indians; and the Catawbas have declared their intention to obſerve very faithfully the peace made at Auguſta, by the Governer, between the ſeveral nations of Indians.

At the choice and requeſt of the Catawbas, his honour the Lieutenant-Governor has ſent a commiſſion appointing FROW to be their King, in the room of old King HAGLER, who was ſhot ſome time ago by their enemy Indians.

Mr. Price, who commands at Fort-Prince-George, Keehowee, is carrying on the repairs at that fort with great diligence; and the ſoldiers employed in that ſervice exert themſelves in work, as the moſt proper manner of acknowledging their ſenſe of the favour ſhewn them, in the ſum which the aſſembly have advanced towards their pay.

The new Fort, to be built inſtead of Fort-Moore, in the moſt convenient ſituation for the protection of the new Iriſh, French and German ſettlements, (called Hillſborough, New-Bourdeaux, and Londonborough) we hear will be ſoon ſet about, the land allotted for it being already ſurveyed, and is to be called Fort-Charlotte.

Letters from the Creek nation and Auguſta, inform, that neither the Superintendant or his deputies, have been able to make any impreſſion on the Mortar, head-man of Oakchoy, either to induce him to be quiet, or repair to any conferences; and that he has been lately, and perhaps is ſtill, in the Cherokee nation, on ſome miſchievous deſign.

All intelligence concerning Indians, or their affairs, in the ſouthern department, having been a long time paſt confined (for good reaſons no doubt) to the ſingle channel of the ſuperintendent, his deputies, and agents; and almoſt every attempt to procure it from other quarters, where its authenticity might be unqueſtionable, having been fruſtrated; the public muſt not be ſurprized that ſo little has appeared in this, while the other paper has abounded with ſo much, on the ſubject; and the printer hopes his paſt ſilence will not be imputed to negligence or inattention in him; whatever he can procure any from tolerable authority, it will be communicated to his readers.
